

Cyto·Tyrosine

220 grams of pure and stable L-tyrosine powder. Indicated for improving cognition during times of stress and supporting thyroid function.

Each scoop contains:

L-Tyrosine

5g

220 grams powder

Vegan and fermented. GMO, gluten, soy and dairy free.

Tyrosine is a conditionally essential amino acid that acts as the building block for cortisol and other important hormones such as dopamine, norepinephrine, epinephrine and thyroxine. As a result, **tyrosine** is indicated for improving cognition, stress coping and thyroid health.

Research has shown that **tyrosine** is capable of improving cognition during times of stress. Specifically, a number of studies have examined the stress response of military personnel. Subjects exposed to stressors such as extreme cold and hypoxic environments demonstrate significant improvements in mood and cognition after taking 100mg of **tyrosine** per kilogram of body weight daily. At a higher dose of 150mg/kg,

improvements in cognition and reduced fatigue after sleep deprivation have been noted. Finally, **tyrosine** supplementation was also able to acutely reduce blood pressure and improve performance on memory tasks during a week of combat training in cadets.

When it comes to thyroid health, daily **tyrosine** supplementation given to healthy individuals during the winter months in Antarctica has been shown to improve mood, increase free triiodothyronine (T3) and reduce elevated thyroid stimulating hormones (TSH). **Tyrosine** has also demonstrated potential benefits in cases of depression, Parkinson's Disease, attention-deficit disorder (ADD) and narcolepsy.

Key points

- Indicated for improving cognition during times of stress and supporting thyroid function
- 5 grams per scoop
- 220 grams per container

Cyto-Tyrosine is a part of the Cyto-Matrix powder series, providing 5 grams of pure and stable L-tyrosine per scoop. Individual amino acids in a powder delivery allow for personalization, dose-specificity and quick-acting results with your patients.
