

IM·Matrix

Comprehensive immune support with six standardized herbal extracts. For acute and chronic infections or as a preventive measure in patients that are frequently ill.

Each capsule contains:

Astragalus extract (root, <i>Astragalus membranaceus</i>) 8:1, 16% polysaccharides	75mg
Echinacea extract (root, <i>Echinacea purpurea</i>) 6:1, 4% polyphenols	150mg
Goldenseal extract (root, <i>Hydrastis canadensis</i>) 4:1	38mg
Ligusticum extract (root, <i>Ligusticum sinense</i>) 5:1	75mg
Schisandra extract (fruit, <i>Schisandra chinensis</i>) 2% schisandrins	75mg
Wild Indigo extract (root, <i>Baptisia tinctoria</i>) 10:1	20mg

60 vegetable capsules

Vegan. Gluten, soy and dairy free.

The human body is constantly challenged by microbes in the environment. Under normal circumstances, our immune system is more than capable of warding off these invaders that can make us ill. However, extra support may be indicated in those with high exposure, chronic stress or individuals that are constantly getting sick. **IM·Matrix** is indicated for all of these circumstances, containing a blend of six standardized herbal extracts.

Of these herbal extracts, *Echinacea angustifolia* is the best-known for immune support, with numerous research trials showing that it can significantly reduce the recurrence of the common cold and reduce the

duration of symptoms in an active infection. *Baptisia tinctoria*, commonly known as wild indigo, has also been shown to significantly reduce the intensity and duration of acute upper respiratory symptoms.

Hydrastis sinensis, better known as goldenseal, is indicated for catarrhal states as a broad-spectrum antimicrobial and a tonic for the respiratory tract. These actions are achieved through the powerful alkaloids, berberine and hydrastine. *Astragalus membranaceus* and its active ingredients are paired nicely with goldenseal because of its demonstrated effectiveness for controlling symptoms of seasonal allergic rhinitis.

Key points

- Contains a blend of six standardized herbal extracts with well-documented antimicrobial and immune supportive actions within the body
- Effective as a preventative measure in those who are demonstrating signs and symptoms of poor immunity or patients that are frequently ill
- Especially indicated for bacterial and viral infections of the upper and lower respiratory tracts, including the common cold and flu

Astragalus membranaceus acts as an immunomodulating agent that upregulates immune cell expression, specifically CD4 and CD8 T cells, various cytokines and macrophages.

The traditional herbs *Schisandra fructus* and *Ligusticum willichia* round out the formula. *Schisandra fructus* is classically used as an adaptogen with liver protectant effects, but it also has anti-tussive and expectorant actions that are beneficial in upper respiratory infections. *Ligusticum willichia* is a known antimicrobial and anti-viral agent, especially toward infections of the upper respiratory tract.

Collectively, the carefully selected blend of six standardized herbal extracts in **IM-Matrix** make it a premier immunomodulating and antimicrobial formula. IM-Matrix is designed as an effective agent against acute bacterial and viral infections of the respiratory tract. However, this formula is also effective for supporting the immune system in those with poor immunity or when used preventatively during times of stress.
